# COMPANY INTRODUCTION

1997

The company was founded in 1997

1400+

Company existing staff 1400 people

5000

with a registered capital of 50 million yuan

150,000,000

Fixed assets of 150 million yuan

**Xiantao Deming Healthcare Products Co., Ltd.**, founded in 1997 with a registered capital of 50 million yuan, is a export enterprise that produces disposable medical products, sanitary products and various protective products with non-woven raw materials. Since its establishment 26 years ago, the company has always adhered to the concept of "honesty first, customer supreme", taking product quality as its life, and serving customers as its purpose. The customer team has expanded year by year, and the market share has increased year by year. The company has made considerable development. So far, the company has a total area of 100 mu, total construction area of 40000 square meters, fixed assets of 150 million yuan, working capital of 200 million yuan, and 1400 employees. The company has four subsidiaries in Wuhan City, Shazui Industrial Park, Pengchang Town, Shahu Town in Xiantao City, with a complete industrial chain of non-woven fabric manufacturing, non-woven fabric products' production, warehousing and marketing. The company has a full set of management structure, sorts of production facilities, and complete qualification certificates. The company has successfully passed the ISO9001, ISO13485, FDA, 510K, GMP, CE and other product quality system certification, and passed the BSCI, WCA and other social responsibility audits. At the same time, it has obtained the national medical device registration certificate Class I and Class II. In 2020, the company successfully registered the "CHU TIAN DE MING" brand, enabling the company's independent brand to go global and sell directly at domestic and abroad.

In recent years, the company's sales have continued to rise and achieved remarkable results. In 2018, the company's annual sales exceeded 100 million yuan; In 2019, the annual sales reached 120 million yuan. In 2020, when the COVID-19 pandemic broke out, the company actively responded to the government's call to do a good job in epidemic prevention and control, vigorously organized the production of epidemic prevention materials, stood up to the tide and took on the responsibility bravely, providing a strong material guarantee for the fight against the epidemic, creating an annual sales of more than 1 billion yuan, a tax of nearly 200 million yuan, and donated more than 10 million yuan of protective materials to different sectors of society, which was highly praised by all sectors of society. In the post-2021 epidemic period, the global economy declined, foreign trade orders dropped sharply, and the company bucked the trend and still got sales of nearly 200 million yuan, which widened the way for the company's development and found the direction.

In the future, the company will rely on foreign trade export, take the domestic market as the growth point, strengthen the internal management of the enterprise, innovate the production process, strengthen the product upgrading, create the well-known trademark of the product, and increase the external extension of the industry. The company plans to build a modern standardized factory building of more than 40000 square meters with the goal of registered production of medical surgical masks, coverall and surgical gown in 2023, further promote the development of the textile, production and marketing chain, comprehensively promote, realize the company's new development, new breakthroughs, create new bright spots in the industry, and strive to create new brilliance.

# ENTERPRISE QUALIFICATION

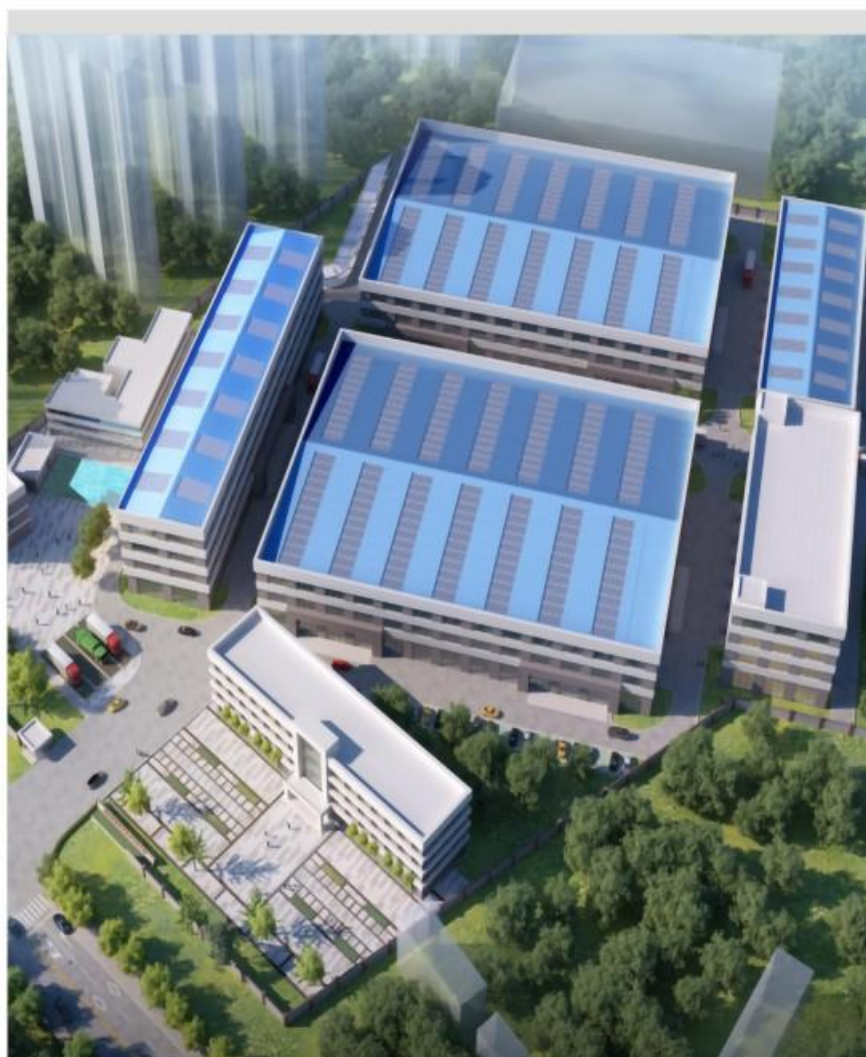

# ENTERPRISE ARTICLE

# NON WOVEN PRODUCTION WORKSHOP

Deming Company expropriated 69 mu of land, new plant area of about 45,954 square meters, auxiliary facilities about 5007 square meters. There are three new production lines of SMS, SPP and SPP non-woven products. After the completion of the project, the annual output can reach 10,000 tons of non-woven products, with an estimated annual output value of 210 million.

# NON WOVEN RAW MATERIAL

## SPUN-BOND POLYPROPYLENE

Art.NO.: DM-NW-100  
Material: Polypropylene/S/SS/SSS

# PROTECTIVE CLOTHING WITH BREATHABLE FILM

Microporous Coveralls are produced from breathable microporous fabric which provides good fluid and barrier protection. Moreover, water vapor transmission is optimized for these garments for better comfort for users. Manufactured and packaged in an ISO certified cleanroom, these garments are individually packed in sealed polyethylene bags. Non-hooded, hooded and hooded-with-boots.

**BREATHABLE MICROPOROUS COVERALL WITH TAPE**

Description	Option

# PP COVERALL

Polypropylene Coveralls comfortably fit over work clothes and protect against non-hazardous materials like dust, dirt, and grime. This lightweight coverall offers a breathable alternative to traditional, bulky coverall suits. With an attached hood and boots, this polypropylene protective suit also protects the head, neck, shoulders, and feet. Disposable polypropylene coveralls are a great option for preventing cross-contamination of products, while also keeping you safe from particulates. Stay cool, comfortable, and protected from head-to-toe across food processing, pharmaceuticals, and more. Non-hooded, hooded and hooded-with-boots.

**PP COVERALL WITH HOOD**

# ISOLATION GOWNS

Isolation Gown provides barrier protection for care giver and healthcare professionals. When used properly, it protects against larger amounts of fluid penetration through splatter and some fluid exposure through soaking of the care giver and healthcare professionals. Thus protecting the patient from possible contaminations or infections. Useful in both medical and non-medical environments, these disposable coats help to maintain the stringent hygiene standards needed in required situations.
